7 March 2022

Dear Roy,

On May 20, 2022, Clean River Partners (formerly named Cannon River Watershed Partnership) is hosting the 2022 **Downstream Environmental Film Festival** in Central Park in Northfield. Visitors will get to watch 10-20 short films created to educate and inspire people to work for cleaner water and healthier communities.

On Saturday, September 17, 2022, we will host the 14th Annual **Cannon River Watershed-Wide CleanUP**. Over the past thirteen years groups like yours have helped over 2,860 volunteers pull more than 173,420 pounds of trash from the Cannon and Straight rivers and area lakes.

With these two great events happening in September, **there are twice as many ways your business can help "Make Clean Water Happen" in our communities.**

Sponsors help fund event supplies, equipment rental, staff time, and other program expenses.

Could you support clean water with a \$500 Steward-level Sponsorship for the Downstream Environmental Film Festival and/or the Cannon River Watershed-Wide CleanUP?

If that level isn't the right fit for you, please consider being a Supporter (\$250) or Friend (\$100) sponsor. We acknowledge those sponsors on our website and through online media. Please review the enclosed sponsorship forms for details.

Please keep in mind that sponsorships for the **Downstream Environmental Film Festival** are due on **Monday, April 18th**. The spring moves fast, so don't forget to send in your sponsorship today!

In partnership for cleaner rivers and lakes,

Kristi Pursell, Executive Director, Clean River Partners
